Schedule Chaos → Controlled

Scheduling Ease: Informed staffing based on census, HPPD, and OT prevention — plus reusable schedule templates for week-over-week ease.

Rules Before Reports: You set the guardrails (overtime, shift swaps, staffing requirements); NASTi enforces them in real time to prevent costly errors before they happen. No more waiting for month-end reports to uncover mistakes.

Employee Flexibility: Staff own their schedules by swapping or posting shifts within company rules. Flexibility for them, control for you.

Shift Talk Without the Static

Built-In Messaging: Send one-way announcements or direct messages between staff and departments — keeping communication simple and on-the-go.

Automated Reminders: Employees get instant alerts for upcoming shifts, schedule changes, or missed punch-outs. Read receipts keep everyone accountable.

Shift Swap Coordination: Employees swap shifts in-app with just a few taps. The system shows only eligible coworkers, making coverage seamless.

Punch Power, Unleashed

Smart punching : Geo-located clock-ins and outs — no punch cards, no breakroom trips. No chasing down timeclock adjustments.

Attendance Tracking: At a glance, get a snapshot of who's punched in and who's on their way for an upcoming shift.
